

RESEARCH STUDY

FREE INTERVENTION FOR CHILDREN WITH AUTISM

Please contact us if you interested in participating in a FREE intervention research study for you and your child with Autism.

- Sessions will be once a week for 12 weeks
- Intervention includes evaluations every 3 months (entry, exit, follow-up)
- Child must be between 24 to 60 months of age
- Family must qualify for Medicaid Services

The purpose of the research is to improve social and communication skills in young children with autism through parent training.

You will receive \$50 for each of the 2 post-treatment assessments. Please contact the research coordinator at (310) 206-1268 to obtain a consent form or for more information

This study is funded by a grant from the U.S. Department of Health and Human Services.

UCLA IRB #G09-02-016-01A
Expiration Date: February 18, 2010
